

List of publications

M. Kotrla

1. M. Kotrla: Phenomenon of antigravity in the supergravity theories, Czech. J. Phys. A34 391-392 (1984), in Czech.
2. M. Kotrla: Supertwistors, in Proc 8th Conference of Czechoslovak physicists, Bratislava 1985 p. 10-11, in Czech.
3. M. Kotrla and J. Niederle: Supertwistors and Superspace, Czech. J. Phys. B35, 602-620 (1985); preprint ICTP : IC/84/237.
4. M. Kotrla and J. Niederle: Supertwistors and Superfields, Czech. J. Phys. B37, 338-349 (1987); preprint ICTP: IC/86/286.
5. M. Kotrla and V. Drchal: Alloy analogy for multiband Hubbard Hamiltonian, phys. stat. sol. (b) 144, 701-707 (1987).
6. M. Kotrla: The study of the electron correlations in the narrow-band systems using Hubbard atomic operators, in Proc. 17th Symp. Electronic Structure of Metals and Alloys, TU Dresden, 1987, p 29-32.
7. V. Drchal, M. Kotrla and J. Kudrnovský: An effective-medium approach to the theory of the CVV Auger spectra, in Proc. 18th Symp. Electronic Structure of Metals and Alloys, TU Dresden, 1988, p 11-14.
8. M. Kotrla: Atomic representation: An approach to the study of the strong local interactions, preprint FZÚ 14-88, Institute of Physics, Czech. Acad. of Sci., Praha 1988.
9. M. Kotrla and V. Drchal: Auger spectra of transition metals: solution for multi-band model, J. Phys: Condensed Matter 1, 4783-4793 (1989).
10. M. Kotrla and V. Drchal: Theory of Auger spectra of transition metals: Effect of orbital degeneracy, in Proc. 19th Symp. Electronic Structure of Metals and Alloys, TU Dresden, 1989 p.73-76.
11. M. Kotrla and V. Drchal: Mean-field solution of strongly correlated systems using Hubbard atomic operators: Hubbard model with infinite U, phys. stat. sol. (b) 157, 635-639 (1990).
12. M. Kotrla : "Energy spectrum of Hubbard model with infinite U", Phys. Lett. A145, 33-36 (1990).
13. C. Garrod, M. Kotrla, A.C. Levi and M. Touzani: Mapping of crystal growth onto the 6-vertex model, ICSOS-III Conference (Milwaukee, 1990) in *The Structure of Surfaces III*, Eds. S.Y. Tong, M.A. van Hove, K. Hakayahagi and X.D. Xie Springer Verlag Berlin, Heidelberg, 1991 p. 44-48.
14. M. Kotrla and A.C. Levi: "Kinetic 6-vertex model as model bcc crystal growth", J. Stat. Phys. 64 (1991) 579-604; preprint SISSA 137/90/CM (Oct 90)
15. M. Kotrla and A.C. Levi: "Kinetic roughness in the BCSOS model", J. Phys. A 25 3121-3132 (1992); preprint SISSA 59/91/CM (May 1991).
16. M. Kotrla: "Growth of rough surfaces (review article)", Czech. J. Phys. B 42 449-477 (1992).
17. M. Kotrla and V. Drchal: "Two-particle excitations of the Hubbard Hamiltonian: Alloy analogy solution", J. Phys: Condensed Matter 4, 4251-4259 (1992).
18. M. Kotrla and V. Drchal: Moment expansion of the two-particle Green function for the Hubbard Hamiltonian, 12th GC CMD EPS, Praha, April 6-9 1992, p82.
19. M. Kotrla and A.C. Levi: Mapping of crystal growth onto the 6-vertex model: Growth mode and surface roughness, 12th GC CMD EPS, Praha, April 6-9 1992, p198.
20. M. Kotrla, A.C. Levi and P. Šmilauer: Roughness and nonlinearities in 2+1-dimensional growth models with diffusion, Europhys. Lett. 20 25-30 (1992).

21. M. Kotrla, A.C. Levi and P. Šmilauer: Scaling in growth models with diffusion: A Monte Carlo study, in *Physics Computing '92*, Eds. R.A. de Groot and J. Nadrchal, Proceedings of the 4th International conference, Prague 1992, p. 378-379.
22. V. Drchal and M. Kotrla: Moment expansion of the two-particle Green function for the Hubbard Hamiltonian, *J. Phys: Condensed Matter* **5**, 171-176 (1993).
23. A.C. Levi and M. Kotrla: Poor man's interpretation of the Nozières-Gallet effect, *Il Nuovo Cimento*, **15 D**, (1993) 485-492
24. A.C. Levi, C. Garrod, M. Kotrla and M. Touzani: Growth modes and models for smooth and rough surfaces, *Physica Scripta* **T49** (1993) 593-598.
25. P. Šmilauer and M. Kotrla, "Crossover effects in Wolf-Villain model of epitaxial growth in 1+1 and 2+1 dimensions", *Phys. Rev. B.* **49** 5769-5772 (1994).
26. M. Kotrla and A.C. Levi: "Kinetics of crystal growth near the roughening transition: A Monte Carlo study", *Surf. Sci.* **317**, 183-193 (1994).
27. M. Kotrla, P. Šmilauer: Kinetic roughening in models of molecular-beam epitaxy growth, *Acta Physica Slovaca* **44** 237-244 (1994).
28. P. Šmilauer, M. Kotrla: Kinetic roughening in growth models with diffusion in higher dimensions, *Europhys. Lett.* **27** 261-266 (1994).
29. M. Kotrla and A.C. Levi: "Monte Carlo study of a transition between different modes of crystal growth", in *Physics Computing '94*, Eds. R. Gruber and M. Tomassini, Proceedings of the 6th joint EPS-APS international conference on physics computing, Lugano 1994, p. 257-260.
30. A.C. Levi, M. Kotrla and E. Scalas: "Growth properties of surfaces and clusters" in Proceedings of the EWSSW '94, February 14-21, Pomporovo, Bulgaria, p. 313-317.
31. M. Kotrla and P. Šmilauer: "Nonuniversality in models of epitaxial growth", *Phys. Rev. B* **53**, 13777-13792 (1996).
32. M. Kotrla: "Coarsening in simple growth model with the Ehrlich-Schwoebel barrier" Proceedings of the 8th Joint EPS-APS International Conference on Physics Computing, eds P. Borcherds, M. Bubak and A. Maksymowicz, Academic computer Centre CYFRONET - Krakow 1996, p. 29-32.
33. M. Kotrla: Numerical simulations in the theory of crystal growth, *Comp. Phys. Comm.* **97**, 82-100 (1996).
34. M. Předota and M. Kotrla: "Stochastic equations for simple discrete models of epitaxial growth", *Phys. Rev. E* **54**, 3933-3942 (1996).
35. A. C. Levi and M. Kotrla: "Theory and simulations of crystal growth", *J. Phys. Cond. Matt.* **9**, 299-344 (1997).
36. M. Kotrla and M. Předota : "Interplay between kinetic roughening and phase ordering", *Europhys. Lett.* **39**, 251-256 (1997).
37. O. S. Trushin, M. Kotrla and F. Máca: "Energy barriers on stepped Ir/Ir(111) surface: A molecular statics calculation" *Surf. Sci.* **389**, 55-65 (1997).
38. O. S. Trushin, K. Kokko, P. T. Salo, W. Hergert and M. Kotrla: "Step roughening effect on adatom diffusion" *Phys. Rev. B* **56**, 12135-12138 (1997).
39. F. Slanina and M. Kotrla: Weak pinning: Surface growth in presence of a defect, *Physica A*, **256** 1-17 (1998).
40. M. Kotrla, M. Předota and F. Slanina: "Kinetic roughening and phase ordering in the two-component growth model" *Surf. Sci.* 402-404 249 (1998).
41. M. Kotrla, F. Slanina, and M. Předota: "Scaling in the two-component surface growth" *Phys. Rev. B* **58**, 10003 (1998).

42. F. Máca, M. Kotrla, and O. S. Trushin: “Energy barriers for diffusion on stepped Pt(111) surface”, *Vacuum* **54**, 113 (1999).
43. F. Slanina, and M. Kotrla: “Extremal dynamics model on evolving networks”, *Phys. Rev. Lett.* **83**, 5587 (1999).
44. F. Máca, M. Kotrla, and O. S. Trushin: “Energy barriers for interlayer diffusion in Pt/Pt(111) and Rh/Rh(111) homoepitaxy: small islands”, *Czech J. Phys. B* **49**, 1591-1596 (1999).
45. F. Máca, M. Kotrla, and O. S. Trushin: “Energy barriers for diffusion on stepped Rh(111) surface”, *Surf. Sci.* **454-456**, 579-583 (2000).
46. M. Kotrla, J. Krug and Šmilauer: “Submonolayer growth with decorated island edges” *Surf. Sci.* **454-456**, 681-685 (2000).
47. M. Kotrla, J. Krug and Šmilauer: “Submonolayer epitaxy with impurities: Kinetic Monte Carlo simulations and rate-equation analysis” *Phys. Rev. B* **62**, 2889-2898 (2000).
48. F. Slanina and M. Kotrla: “Random networks created by biological evolution” *Phys. Rev. E* **62**, 6170-6177 (2000).
49. M. Kotrla, J. Krug and Šmilauer: “Effects of mobile and immobile impurities on two-dimensional nucleation” *Surf. Sci.* **482-485**, 840-843 (2001).
50. M. Kotrla, J. Krug and Šmilauer: “Effects of adsorbates on submonolayer growth” in *Collective Diffusion on Surfaces: Correlation Effects and Adatom Interactions*, M. C. Tringides and Z. Chvoj (eds.), Kluwer Academic Publishers, 2001, pp. 247-257.
51. M. Kotrla and J. Krug: “Effects of atomic interactions in two-component submonolayer growth”, in *Atomic Aspects of Epitaxial Growth*, M. Kotrla et al. (eds.), Kluwer Academic Publishers, 2002 p. 489-498.
52. J. Kallunki, J. Krug and M. Kotrla: “Competing mechanisms for step meandering in unstable growth” *Phys. Rev. B* **65**, 205411-1-7 (2002).
53. M. Kotrla, F. Slanina and J. Steiner: “Dynamic scaling and universality in evolution of fluctuating random networks”, *Europhys. Lett.* **60**, 14-20 (2002)
54. M. Kotrla, “Effects of adsorbates on submonolayer epitaxial growth” in proceedings of 14. conference of Czech and Slovak physicists, September 9-12, 2002, Plzeň, p. 369 ISBN 80-7082-907-9
55. M. Kotrla, T. Volkman, F. Much and M. Biehl Mechanism of formation of self-assembled nanostructures in heteroepitaxy in Proceedings of Int. Conference NANO03, October 21-23, 2003, Brno, ed. P. Sandera, FSI VUT Brno, ISBN 80-214-2527-X, 98-103
56. Kocán, P. Sobotík, I. Ošřádal, M. Kotrla: ”Continuous and correlated nucleation during nonstandard island growth at Ag/Si(111)-(7x7) heteroepitaxy”, *Phys Rev. B* **69**, 165409-1-6 (2004)
57. P. Kocán, P. Sobotík, I. Ošřádal, M. Kotrla: ”Self-organized growth of Ag islands on Si(111)-(7x7) - optimization of an STM experiment by means of KMC simulations”, *Surf. Sci.* **566-568**, 216-220 (2004).
58. C. Polop, H. Hansen, W. Langenkamp, Z. Zhong, C. Busse, U. Linke, M. Kotrla, P. Feibelman, T. Michely, ”Oscillatory interaction between O impurities and Al adatoms on Al(111) and its effect on nucleation and growth” *Surf. Sci.* **575**, 89-102 (2005).
59. F. Slanina, J. Krug and M. Kotrla: ”Kinetics of step bunching during growth: A minimal model” *Phys Rev. E* **71**, 41605 (2005).
60. T. Volkman, F. Much, M. Biehl, and M. Kotrla: ”Interplay of Strain Relaxation and Chemically Induced Diffusion Barriers: Nanostructure Formation in 2D Alloys” *Surf. Sci.* **586**, 157-173 (2005).
61. M. Kotrla, S. Weber, F. Much, M. Biehl, and W. Kinzel, Self-organized nano-patterns in strained 2D metallic alloys: Droplets vs. stripes, *Acta Metallurgica Slovaca* **13**, 70-75 (2007).

62. S. Weber, M. Biehl, M. Kotrla, and W. Kinzel: Simulation of self-assembled nanopatterns in strained 2D alloys on the face centered cubic (111) surface, *J. Phys.: Condens. Matter* **20**, 265004 (7pp) (2008).
63. Jakub Javorský, Martin Setvín, Ivan Ošřádal, Pavel Sobotík and M. Kotrla: Heterogeneous nucleation and adatom detachment at one-dimensional growth of In on Si(100)-2 x 1, *Phys. Rev. B* **79**, 165424 (2009) [9 pages]; DOI: 10.1103/PhysRevB.79.165424
64. Dmytro Goykolov, and Miroslav Kotrla: Study of the island morphology at the early stages of Fe/Mo(110) MBE growth, *Cent. Eur. J. Phys.* **7** (2) 220-226 (2009); DOI: 10.2478/s11534-008-0124-z
65. Martin Mašín, and Miroslav Kotrla: Pulsed depositions vs. continuous growth: Monte Carlo study of submonolayer regime e-Journal of Surface and Nano Technology (e-J. Surf. Sci. Nanotech. **8** 65-68 (2010); DOI: 10.1380/ejssnt.2010.65
66. Martin Mašín, and Miroslav Kotrla: Effect of persistence of compact surface clusters during pulsed laser deposition on submonolayer growth, *Europhys. Lett.* **90** 18006 (2010); DOI: 10.1209/0295-5075/90/18006
67. Martin Mašín, and Miroslav Kotrla: Influence of control and material parameters on island density in early stage of pulsed laser deposition, *Thin Solid Films*, Volume: 520 Issue: 15 Pages: 4965-4970 DOI: 10.1016/j.tsf.2012.03.021
